

CONSOLIDATION AND DATA INTEGRATION

A man in a black t-shirt and shorts is rappelling down a dark rock face. He is holding a rope that extends from the top right corner of the frame. The background is a bright blue sky with a large, bright sun creating a lens flare effect. The overall scene is one of adventure and conquering a challenge.

Summit

A silhouette of a mountain peak is centered against a dark blue background. The word 'Summit' is written in a large, white, sans-serif font across the bottom of the image, with the mountain peak appearing behind the letters.

Due to the current market reality that firms are consolidating and outsourcing more than ever, you need a tool that can help you conquer the challenges of data integration. Summit includes a Master-Sub relationship that is unparalleled in the industry. Roll new books of business as a Subordinate under your Master portfolio, and gain comprehensive search and reporting functionality across all books of business while maintaining data separation.

Forge a trail to an easier, more comprehensive Master-Sub relationship with DataPath Summit.

Summit Consolidation and Data Integration

Summit was also designed to simplify data integration. You already have data transfer systems in place with distinct file structures. Summit's integration tool lets you continue to send and receive files in the same format you use now. You tell Summit the format in which you will provide the data and how to expect it. Summit takes it from there.
